## Broadcast Video Desk Help Sheet

### Hardware

1. Switch on the video desks at the white switch on the sloped panel labelled 'Switched Power'.
2. Ensure the only lights lit on the ATEM Mini Pro are as in the photo overleaf.
3. Use the ATEM Mini Pro buttons 1 to 4 to switch between the three cameras (1,2,3) and the output of the larger Presentation video mixer (song lyrics, videos and DVDs used in the service that are up on the video projector) . The current option is what goes out to Youtube and Zoom.
